

Max-Boost FUEL OCTANE BOOSTER

Royal Purple® Max-Boost™ is a high-performance octane booster and fuel treatment that increases gasoline octane, reduces emissions, and enhances engine performance while stabilizing fuel. Max-Boost is formulated with MMT, which delivers the best octane enhancement to help eliminate engine damaging detonation, pre-ignition, and pinging or knocking from low octane gasoline.

Max-Boost is formulated for engines equipped with carburetors, port fuel injection and direct injection, as well as turbocharged, supercharged and nitrous-injected engines. Safe for use in leaded and unleaded gasolines, and alternate fuels like gasohol, reformulated gasoline, and all ethanol blends. Max-Boost is safe for oxygen sensors and catalytic converters.

PERFORMANCE ADVANTAGES

- INCREASES OCTANE BY 3 NUMBERS OR 30 POINTS – Increases safety margin in modified/tuned engines
- PROTECTS AGAINST ENGINE DAMAGE – Reduces pinging and likelihood of detonation and pre-ignition
- RESTORES LOST ECONOMY AND POWER– Reduces need for ignition-retard in computer controlled engines
- INCREASES DRIVEABILITY – Maximizes horsepower; improves engine responsiveness

RECOMMENDED TREAT RATE

One can treats up to 25 gallons of gasoline. Do not exceed 2 ounces of Max-Boost per gallon of fuel. Pour entire can into tank before fill-up. Clean immediately if spills occur, as product can permanently stain painted surfaces. **Do not expose liquid to direct or indirect sunlight.** Replace cap after can has been emptied, and dispose of properly. Max-Boost is a racing formula and is not street legal.
